CIRCULAR

It has been observed that the programmes of the same nature for different states/ regions are being organised jointly which is not suggestable in view of the maintaining the quality of the programme. It was discussed in the faculty meeting that programmes may not be merged and may be organized on different dates. Also, to maintain the quality of sessions, managing proper interactions with the participants and discussing various issues in the session, a moderate number of participants preferably of a single programme should be considered/kept. Hence, all the programme coordinators are requested that the programmes may not be clubbed and be organised separately. If any two programmes of same nature are scheduled on same dates then the sessions may be taken separately and adjusted in consultation with the faculty as per their availability.

This issues with the approval of the competent authority.
