Gandhiji's Talisman

I will give you a talisman. Whenever you are in doubt or when the self becomes too much with you, apply the following test:

Recall the face of the poorest and the weakest man whom you may have seen and ask yourself if the step you contemplate is going to be of any use to him. Will he gain anything by it? Will it restore him to a control over his own life and destiny? In other words, will it lead to Swaraj for the hungry and spiritually starving millions?

Then you will find your doubts and your self melting away.

M.K. Gandhi

FOREWORD

The Pandit Sunderlal Sharma Central Institute of Vocational Education (PSSCIVE), a constituent of the National Council of Educational Research and Training (NCERT) is spearheading the efforts of developing learning outcome-based curricula and courseware aimed at integrating both vocational and general education to open pathways of career progression for students. The curriculum has been developed for the vocational education programme introduced under the Centrally Sponsored Scheme of *Samagra Shiksha* of the Ministry of Education (erstwhile, Ministry of Human Resource Development) and is aligned to the National Skill Qualification Framework (NSQF). The curricula for vocational courses are being developed under the project approved by the Project Approval Board (PAB) of '*Samagra Shiksha*', which is an overarching programme for the school education sector extending from pre-school to Grade 12.

It is a matter of great pleasure to introduce this learning outcome-based curriculum as part of the vocational education and training package for the job role/vocational subject of "Drone Operator – Multirotor". The curriculum has been developed for the secondary students of Grades 11 and 12 and is aligned to the National Occupation Standards (NOSs) for the job role. The curriculum aims to provide children with employability and vocational skills to support occupational mobility and lifelong learning. It will help them to acquire specific occupational skills that meet employers' immediate skill needs. The teaching-learning is to be done through interactive sessions in classrooms, practical activities in laboratories or workshops, projects, field visits, etc. and professional experience is to be provided through on-the-job training.

The curriculum has been developed and reviewed by a group of experts and their contributions are duly acknowledged. The utility of the curriculum will be adjudged by the qualitative improvement that it brings about in teaching-learning. The feedback and suggestions on the content by the teachers and other stakeholders will be of immense value to us in bringing about further improvement in this document.

DINESH PRASAD SAKLANI
Director
National Council of Education Research and Training

PREFACE

India today stands poised at a very exciting juncture in its saga. The potential for achieving inclusive growth is immense and the possibilities are equally exciting. The world is looking at us to deliver sustainable growth and progress. To meet the growing expectations, India will largely depend upon its young workforce. In order to fulfil the growing aspirations of our youth and the demand for a skilled human resource, the Ministry of Education, Government of India introduced the revised Centrally Sponsored Scheme of Vocationalisation of School Education under *Samagra Shiksha*. For spearheading the scheme, the PSS Central Institute of Vocational Education (PSSCIVE) was entrusted with the responsibility to develop learning outcome-based curricula, student textbooks and e-learning materials for the job roles in various sectors.

The PSSCIVE firmly believes that the vocationalisation of education in the nation needs to be established on a strong footing of philosophical, cultural and sociological traditions and it should aptly address the needs and aspirations of the students besides meeting the skill demands of the industry. In order to honour its commitment to the nation, the PSSCIVE is developing learning outcome-based curricula with the involvement of faculty members and leading experts in the field. It is being done through the concerted efforts of leading academicians, professionals, policymakers, partner institutions, Vocational Education and Training (VET) experts, industry representatives, and teachers.

The expert group, through a series of consultations, working group meetings and use of reference materials develops a National curriculum. We extend our gratitude to all the contributors for selflessly sharing their precious knowledge, acclaimed expertise, and valuable time and positively responding to our request for development of curriculum.

The success of this curriculum depends upon its effective implementation, and it is expected that the managers of vocational education programme, vocational educators, vocational teachers/trainers, and other stakeholders will make earnest efforts to provide better facilities, develop linkages with the industry and foster a conducive learning environment for effectively transacting the curriculum and to achieve the learning outcomes as per the content of the curriculum document.

DEEPAK PALIWAL
Joint Director
PSS Central Institute of Vocational Education

ACKNOWLEDGEMENTS

On behalf of the team at the PSS Central Institute of Vocational Education (PSSCIVE), we are grateful to the members of the Project Approval Board (PAB) of *Samagra Shiksha* and the officials of the Ministry of Education (MoE), Government of India for the financial support to the project for development of learning outcome-based curricula.

We are grateful to the Director, National Council of Educational Research and Training (NCERT) for his support and guidance. We also acknowledge the contributions of our colleagues at the NCERT, National Council for Vocational Education and Training (NCVET), National Skill Development Corporation (NSDC) and Aerospace and Aviation Skill Sector Council (AASSC) for their academic support and cooperation.

We are grateful to Prof. Vinay Swarup Mehrotra, Course Coordinator for his untiring efforts and contribution to the development of this learning outcome-based curriculum.

The contributions of the experts and the editorial support provided by Mrs. Shubha Misra, Assistant Professor in Education (Contractual), and Ms Akansha Dubey, Assistant Editor at PSSCIVE, are appreciated and acknowledged.

1. COURSE OVERVIEW

COURSE TITLE: DRONE OPERATOR-MULTIROTOR

Multirotor drone has wide applications which include power line inspections, wild-life monitoring, oil and gas exploration, land surveying, disaster relief, etc. The Multirotor Drone Operator is responsible for take-off, manoeuvring, flying and landing of drones using a legal command and control link, transmitter and receiver pairs. The individual on the job should have the ability to think logically, demonstrate good situational control, steady hand at operations, attention to detail, ability to prioritize workload and fair communication skills. This course provides the student with an in-depth knowledge of rules, regulations and the basics of aviation. Students will be trained to handle emergency situations with safety and precautions. The course will prepare individuals for a career in the rapidly growing drone industry, ensures safe and responsible use of drones in diverse fields and contribute to technological advancements and innovative solutions in various sectors.

COURSE OUTCOMES:

On completion of the course, students should be able to:

- Describe the historical context and evolution of drones;
- Describe the various components of multirotor drone;
- Register a drone with DGCA and follow their guidelines regarding registration and identification;
- Plan drone flights as per the rules and regulations of the Directorate General of Civil Aviation (DGCA), read maps, and navigate drones efficiently using GPS and other tools;
- Develop hands-on drone piloting skills, including takeoff, landing, hovering, and maneuvering in different environments;
- Calibrate the Global Positioning System (GPS) for accurate positioning;
- Identify factors impacting drone flight such as environment, weather, and geography in planning and operations;
- Handle scenarios where GPS signal is lost or adverse weather conditions or situations;
- Operate the spraying system judiciously based on GPS-guided patterns;
- Foster collaboration and teamwork skills, emphasizing the importance of effective communication and coordination in multirotor drone operations; and
- Guide others through the process of obtaining certifications and complying with regulations for commercial drone operation.

COURSE REQUIREMENTS: The learner should be holding a 10th Grade pass certificate.

COURSE DURATION: 600 hrs

Grade11: 300 hrs

Grade 12: 300 hrs

Total: 600 hrs

2. SCHEME OF UNITS AND ASSESSMENT

The unit-wise distribution of hours and marks for Grade 11 is as follows:

GRADE 11			
	Units	No. of Hours for Theory and Practical 300	Max. Marks for Theory and Practical 100
Part A	Employability Skills		
1.	Unit 1: Communication Skills – III	25	
2.	Unit 2: Self-management Skills – III	25	
3.	Unit 3: Information and Communication Technology Skills – III	20	
4.	Unit 4: Entrepreneurial Skills – III	25	
5.	Unit 5: Green Skills – III	15	
	Total	110	
Part B	Vocational Skills		
6.	Unit 1: Introduction to Drones	40	
7.	Unit 2: Multicopter Drone - Components and Applications	35	
8.	Unit 3: Payloads and Image Interpretation	30	
9.	Unit 4: Aerodynamics and Configuration of Multicopter Drones	30	
10.	Unit 5: Flying Multicopter Drone on Simulator	30	
	Total	165	
Part C	Practical Work		
	Practical Examination	06	15
	Written Test	01	10
	Viva Voce	03	10
	Total	10	35
Part D	Project Work/Field Visit		
	Practical File/Student Portfolio	10	10
	Viva Voce	05	05
	Total	15	15
	Grand Total	300	100

The unit-wise distribution of hours and marks for Grade 12 is as follows:

GRADE 12			
	Units	No. of Hours for Theory and Practical 300	Max. Marks for Theory and Practical 100
Part A	Employability Skills		
1.	Unit 1: Communication Skills – IV	25	
2.	Unit 2: Self-management Skills – IV	25	
3.	Unit 3: Information and Communication Technology Skills – IV	20	
4.	Unit 4: Entrepreneurial Skills – IV	25	
5.	Unit 5: Green Skills – IV	15	
	Total	110	10
Part B	Vocational Skills		
6.	Unit 1: Safety Regulations and Procedures in Drone Operation	30	40
7.	Unit 2: Emergency Procedures in Drone Operation	30	
8.	Unit 3: Planning for Flying Multirotor Drone in Airspace	40	
9.	Unit 4: Operating a Multirotor Drone	65	
	Total	165	40
Part C	Practical Work		
	Practical Examination	06	15
	Written Test	01	10
	Viva Voce	03	10
	Total	10	35
Part D	Project Work/Field Visit		
	Practical File/Student Portfolio	10	10
	Viva Voce	05	05
	Total	15	15
	Grand Total	300	100

3. TEACHING/TRAINING ACTIVITIES

The teaching and training activities have to be conducted in classroom, laboratory/ workshops and field visits. Students should be taken to field visits for interaction with experts and to expose them to the various tools, equipment, materials, procedures and operations in the workplace. Special emphasis should be laid on the occupational safety, health and hygiene during the training and field visits.

CLASSROOM ACTIVITIES

Classroom activities are an integral part of this course and interactive lecture sessions, followed by discussions should be conducted by trained vocational teachers. Vocational teachers should make effective use of a variety of instructional or teaching aids, such as audio-video materials, colour slides, charts, diagrams, models, exhibits, hand-outs, online teaching materials, etc. to impart knowledge, and training on skills and attitude to the students.

PRACTICAL WORK IN LABORATORY/WORKSHOP

Practical work may include, but should not limited to hands-on-training, simulated training, role-play, case-based studies, exercises, etc. Equipment and supplies should be provided to enhance hands-on learning experience of students. Only trained personnel should teach specialised techniques. A training plan that includes tools, equipment, materials, skills and activities to be performed by the students, etc. should be submitted by the vocational teacher to the Head of the Institution.

FIELD VISITS

At least three field visits should be conducted in a year. In field visits, children will go outside the classroom to obtain specific information from experts or to make observations of the activities. A checklist of observations to be made by the students during the field visits should be developed by the Vocational Teacher for systematic collection of information by the students on the various aspects. Principals and Teachers should identify the different locations for field visits within a short distance from the school and make necessary arrangements for the visits.

4. ASSESSMENT AND CERTIFICATION

The National Skill Qualifications Framework (NSQF) is based on outcomes referenced to the National Occupation Standards (NOSs), rather than inputs. The NSQF level descriptors, which are the learning outcomes for each level, include the process, professional knowledge, professional skills, core skills and responsibility. The assessment is to be undertaken to verify that individuals have the knowledge and skills needed to perform a particular job and that the learning programme undertaken has delivered education at a given standard. The assessment should be reliable, valid, flexible, convenient, cost-effective and above all, it should be fair and transparent. Standardised assessment tools should be used for assessment of knowledge of students. Necessary arrangements should be made for using technology in assessment of students.

KNOWLEDGE ASSESSMENT (THEORY)

Knowledge Assessment should include two components; one-comprising internal assessment and second- an external examination, including theory examination to be conducted by the Board. The assessment tools shall contain components for testing the knowledge and application of knowledge. The knowledge test can be objective paper-based test or short structured questions, based on the content of the curriculum.

WRITTEN TEST allows candidates to demonstrate that they have the knowledge and understanding of a given topic. Theory question paper for the vocational subject should be prepared by the subject experts comprising a group of expert academicians, experts from existing vocational subject teachers, and subject matter experts from university/colleges or industry. The respective Sector Skill Council should be consulted by the Central/State Board for preparing the panel of experts for question paper setting and conducting the examinations. The blueprint for the question paper may be as follows:

Duration: 3 hrs

Maximum Marks: 40

S. No.	Typology of Question	No. of Questions			Marks
		Very Short Answer (1 mark)	Short Answer (2 Marks)	Long Answer (3 Marks)	
1.	Remembering – (Knowledge-based simple recall questions, to know specific facts, terms, concepts, principles, or theories; identify, define or recite, information)	3	2	2	13
2.	Understanding – (Comprehension – to be familiar with meaning and to understand conceptually, interpret, compare, contrast, explain, paraphrase, or interpret information)	2	3	2	14
3.	Application – (Use abstract information in concrete situation, to apply knowledge to new situations: Use given content to interpret a situation, provide an example, or solve a problem)	0	2	1	07
4.	High Order Thinking Skills – (Analysis and Synthesis – classify, compare, contrast, or differentiate between different pieces of information; organise and/ or integrate unique pieces of information from a variety of sources)	0	2	0	04
5.	Evaluation – (Appraise, judge, and/or justify the value or worth of a decision or outcome, or to predict outcomes based on values)	0	1	0	02
	Total	5x1=5	10x2=20	5x3=15	40

SKILL ASSESSMENT (PRACTICAL)

Assessment of skills by the students should be done by the assessors/examiners on the basis of practical demonstration of skills by the candidate, using a “competency checklist”. The student has to demonstrate competency against the performance criteria. The assessors assessing the skills of the students should possess a current experience in the industry and should have undergone an effective training in assessment principles and practices. The Sector Skill Council should ensure that the assessors are provided with the training on the assessment of competencies.

Practical examination: Practical examination allows candidates to demonstrate the knowledge and understanding of performing a task. This will include the performance of tasks and viva voce. Teachers/Examiner will clearly define the tasks that candidates are required to perform during the practical examination. These tasks should align with the learning objectives of the course. Students are to be evaluated based on their skills, technique, accuracy, and overall performance.

For the practical exam, there should be a team of two evaluators – the subject teacher and the expert from the relevant industry certified by the Board or concerned Sector Skill Council. The same team of examiners will conduct the viva voce. They will assess the candidates' skills, adherence to industry standards, and efficiency in task execution. Special emphasis should be on assessment of the candidate's ability to troubleshoot and solve problems related to the tasks. During the viva-voce, focus should be on assessment of candidate's communication skills and understanding of the subject.

Project Work: Project work is a great way to assess the practical skills on a certain period or timeline. Projects should simulate real-world scenarios, allowing students to solve problems or create something tangible using the skills and knowledge they've acquired. Projects should align with the curriculum's learning objectives, ensuring that students are applying relevant concepts and skills. Clear and detailed guidelines, including project objectives, evaluation criteria, and deadlines should be provided by the teachers/assessors. Rubrics, which would include aspects like content, creativity, organization, presentation, and adherence to deadlines, should be used by the Assessors to establish specific criteria for marking or grading.

Field visits can be followed by the submission of reports by the students, based on checklist. Teachers will develop a detailed checklist of items or questions students need to address during the visit. This could include specific observations, data collection, interviews, etc. Teachers will assess the reports based on the completeness of checklist items, depth of observations, analysis, and overall presentation. After the visit, teachers will also encourage students to reflect on their field experience, for example what students learned, How will they apply the knowledge gained through the field visit, etc.

Student Portfolio is a compilation of documents that supports the candidate's claim of competence. Documents may include reports, articles and photos of products prepared by students in relation to the unit of competency. Copies of certificates and awards received for academic achievements, extracurricular activities, or competitions may also be included in the portfolio. Student's portfolio may also include personal reflections of the students on their learning journey, challenges faced, and lessons learned.

Viva-voce allows candidates to demonstrate communication skills and content knowledge. Audio or video recording can be done at the time of viva voce. The number of external examiners would be decided as per the existing norms of the Board and these norms should be suitably adopted/adapted as per the specific requirements of the vocational subject. Viva voce should also be conducted to obtain feedback on the student's experiences and learning during the project work/field visits.

5. UNIT CONTENTS

GRADE 11

Part A: Employability Skills

S.No.	Units	Duration (hrs)
1.	Communication Skills- III	25
2.	Self-management Skills – III	25
3.	Information and Communication Technology Skills - III	20
4.	Entrepreneurial Skills – III	25
5.	Green Skills – III	15
Total		110

UNIT 1: COMMUNICATION SKILLS – III			
Learning Outcome	Theory (10 hrs)	Practical (15 hrs)	Duration (25 hrs)
1. Demonstrate knowledge of communication	1. Introduction to communication 2. Importance of communication 3. Elements of communication 4. Perspectives in communication 5. Effective communication	1. Role-play on the communication process 2. Group discussion on factors affecting perspectives in communication 3. Classroom discussion on the 7Cs (i.e. Clear, Concise, Concrete, Correct, Coherent, Courteous and Complete) of effective communication 4. Chart making on elements of communication	03
2. Demonstrate verbal communication	1. Verbal communication	1. Role-play of a phone conversation.	02

	2. Public Speaking	2. Group exercise on delivering speech and practicing public speaking	
3. Demonstrate non-verbal communication	<ol style="list-style-type: none"> 1. Importance of non-verbal communication 2. Types of non-verbal communication 3. Visual communication 	<ol style="list-style-type: none"> 1. Role-play on non-verbal communication 2. Group exercise and discussion on Do's and Don'ts to avoid body language mistakes 3. Group activity on methods of communication 	02
4. Speak using correct pronunciation	<ol style="list-style-type: none"> 1. Pronunciation basics 2. Speaking properly 3. Phonetics 4. Types of sounds 	<ol style="list-style-type: none"> 1. Group activities on practicing pronunciation 	01
5. Apply an assertive communication style	<ol style="list-style-type: none"> 1. Important communication styles 2. Assertive communication 3. Advantages of assertive communication 4. Practicing assertive communication 	<ol style="list-style-type: none"> 1. Group discussion on communication styles 2. Group discussion on observing and sharing communication styles 	03
6. Demonstrate the knowledge of saying no	<ol style="list-style-type: none"> 1. Steps for saying 'No' 2. Connecting words 	<ol style="list-style-type: none"> 1. Group discussion on how to respond 2. Group activity on saying 'No' 	02
7. Identify and use parts of speech in writing	<ol style="list-style-type: none"> 1. Capitalisation 2. Punctuation 3. Basic parts of speech 4. Supporting parts of speech 	<ol style="list-style-type: none"> 1. Group activity on identifying parts of speech 2. Writing a paragraph with punctuation marks 3. UNIT 3: INFORMATION AND COMMUNICATION TECHNOLOGY-III

Learning Outcome	Theory (08 hrs)	Practical (12 hrs)	Duration (20 hrs)
1. Create a document on the word processor	<ol style="list-style-type: none">1. Introduction to ICT2. Advantages of using a word processor.3. Work with Libre Office Writer	<ol style="list-style-type: none">1. Group activity on demonstration and practice of the following:<ul style="list-style-type: none">• Creating a new document• Typing text• Saving the text• Opening and saving file on Microsoft word/Libre Office Writer.	02
2. Identify icons on the toolbar	<ol style="list-style-type: none">1. Status bar2. Menu bar3. Icons on the Menu bar4. Multiple ways to perform a function	<ol style="list-style-type: none">1. Group activity on using basic user interface of LibreOffice writer2. Group activity on working with Microsoft Word.	02
3. Save, close, open and print document	<ol style="list-style-type: none">1. Save a word document2. Close3. Open an existing document4. Print	<ol style="list-style-type: none">1. Group activity on performing the functions for saving, closing and printing documents in LibreOffice Writer2. Group activity on performing the functions for saving, closing and printing documents in Microsoft Word	02
4. Format text in a word document	<ol style="list-style-type: none">1. Change style and size of text2. Align text3. Cut, Copy, Paste4. Find and replace	<ol style="list-style-type: none">1. Group activity on formatting text in LibreOffice Writer2. Group activity on formatting text in Microsoft Word	02

5. Check spelling and grammar in a word document	1. Use of spell checker 2. Autocorrect	1. Group activity on checking spellings and grammar using LibreOffice Writer 2. Group activity on checking spellings and grammar using Microsoft Word	02
6. Insert lists, tables, pictures, and shapes in a word document	1. Insert bullet list 2. Number list 3. Tables 4. Pictures 5. Shapes	1. Practical exercise of inserting lists and tables using LibreOffice Writer	03
7. Insert header, footer and page number in a word document	1. Insert header 2. Insert footer 3. Insert page number 4. Page count	1. Practical exercise of inserting header, footer and page numbers in LibreOffice Writer 2. Practical exercise of inserting header, footer and page numbers in Microsoft Word	03
8. Make changes by using the track change option in a word document	1. Tracking option 2. Manage option 3. Compare documents	1. Group activity on performing track changes in LibreOffice Writer 2. Group activity on performing track changes in Microsoft Word	04
Total			20

UNIT 4: ENTREPRENEURIAL SKILLS – III

Learning Outcome	Theory (10 hrs)	Practical (15 hrs)	Duration (25 hrs)
1. Differentiate between different kinds of businesses	1. Introduction to entrepreneurship 2. Types of business activities	1. Role-play on different kinds of businesses around us	03
2. Describe the significance of entrepreneurial values	1. Meaning of value 2. Values of an Entrepreneur 3. Case study on qualities of an entrepreneur	1. Role-play on qualities of an entrepreneur	03

3. Demonstrate the attitudinal changes required to become an entrepreneur	1. Difference between the attitude of entrepreneur and employee	1. Interviewing employees and entrepreneurs	03
4. Develop thinking skills like an entrepreneur	1. Problems of entrepreneurs 2. Problem-solving 3. Ways to think like an entrepreneur	1. Group activity on identifying and solving problems	04
5. Generate business ideas	1. Principles of idea creation 2. Generating a business idea 3. Case studies	1. Group activity to create business ideas	04
6. Describe customer needs and the importance of conducting a customer survey	1. Understanding customer needs 2. Conducting a customer survey	1. Group activity to conduct a customer survey	04
7. Create a business plan	1. Importance of business planning 2. Preparing a business plan 3. Principles to follow for growing a business 4. Case studies	1. Group activity on developing a business plan	04
Total			25

UNIT 5: GREEN SKILLS – III

Learning Outcome	Theory (07 hrs)	Practical (08 hrs)	Duration (15 hrs)
1. Describe the importance of the main sector of the green economy	1. Meaning of ecosystem, food chain and sustainable development 2. Main sectors of the green economy- E-waste management, green transportation, renewal energy, green construction, and water management	1. Group discussion on sectors of green economy 2. Preparing posters on various sectors for promoting green economy	06

2. Describe the main recommendations of policies for the green economy	1. Policies for a green economy	1. Group discussion on initiatives for promoting the green economy 2. Writing an essay or a short note on the important initiatives for promoting green economy.	03
3. Describe the major green sectors/ areas and the role of various stakeholders in the green economy	1. Stakeholders in the green economy	1. Group discussion on the role of stakeholders in the green economy 2. Making solar bulbs.	03
4. Identify the role of government and private agencies in the green economy	1. Role of the government in promoting a green economy 2. Role of private agencies in promoting green economy	1. Group discussion on the role of Government and Private Agencies in promoting a green economy. 2. Preparing posters on green sectors.	03

Part B–Vocational Skills

S. No.	Units	Duration (hrs)
1.	Introduction to Drones	40
2.	Multicopter Drone - Components and Applications	35
3.	Payloads and Image Interpretation	30
4.	Aerodynamics and Configuration of Multicopter Drones	30
5.	Flying Multicopter Drone on Simulator	30
Total		165

UNIT 1: INTRODUCTION TO DRONES

Learning Outcome	Theory (15 hrs)	Practical (25 hrs)	Duration (40 hrs)
1. Identify different types of drones	<ol style="list-style-type: none"> 1. Introduction to drones 2. Historical context and evolution of drones. 3. Classification of drones: <ol style="list-style-type: none"> (i) based on propellers (fixed-wing drones, single rotor drones, multirotor drones, quadcopters, hexacopters, octocopters, and hybrid drones) ; (ii) based on weight; (iii) based on range (close-range, short-range, mid-range); (iv) based on power: (battery powered, fuel cell-powered, gasoline/petrol-powered , solar-powered and hybrid-powered drones). 	<ol style="list-style-type: none"> 1. Visit to the drone laboratory to identify different type of drones, such as quadcopters, hexacopters, fixed-wing drones, and hybrid models. Explain their unique features and use. 2. Make drones out of various locally available materials, such as wood, thermocol, plastic, fibre, etc. 3. Conduct live demonstrations of various drones, showcasing their flight capabilities, maneuverability, and payload capacities. Study the internal and external components of drones, including motors, propellers, flight controllers, GPS modules, cameras, and sensors. 	20
2. Describe basic components of a drone	<ol style="list-style-type: none"> 1. Basic components of a drone: frame, motors, propellers, flight controller battery, electronic speed controllers, radio transmitter and receiver, sensors, on-board camera/gimbal, propeller guards and landing gear. 	<ol style="list-style-type: none"> 1. Visit to the drone technology lab to observe basic components and their functions. 2. Demonstrate drone components like frame, battery, flight controllers, sensors, motors and propellers in the laboratory. 	10

		3. Draw schematic diagram showing different components of the drone.	
3. Demonstrate knowledge of Drone Rules 2021	<p>1. Unmanned Aircraft System Rules (UAS Rules), 2021, notified by the Central Government on August 25, 2021.</p> <ul style="list-style-type: none"> (i) Terms, Regulations and Organisations related to UAVs or Drones (ii) Certificate of airworthiness (iii) Controlled airspace (iv) Digital sky platform (v) Geo-fencing (vi) Prototype drone (vii) Unmanned aircraft system traffic management system (viii) Unique identification number of drones (ix) Classification of zones as per the Drone Rules 2021 – red, yellow and green. <p>2. Drone Certification</p> <p>3. Remote Pilot Licensing</p>	<p>1. Organise lecture sessions on Unmanned Aircraft System rules and regulations for drones.</p> <p>2. Slide presentation and poster preparation on the UAS rules and regulation for drones.</p> <p>3. Discuss the evolution of drone regulations, including key incidents or developments that led to specific rules.</p> <p>4. Study real-world incidents involving drones, examining what went wrong and how these incidents shaped or reinforced UAS regulations.</p> <p>5. Conduct a workshop where students simulate a scenario involving drone regulations. They can play roles as drone operators, regulators, and law enforcement officers, learning about decision-making processes.</p> <p>6. Visit drone research facilities, manufacturing units, or drone pilot training centers to understand how these entities adhere to regulations</p>	10

		in their operations. 7. Use drone flight simulators to teach students about different flight scenarios while adhering to regulations.	
Total			40

UNIT 2: MULTIROTOR DRONE - COMPONENTS AND APPLICATIONS

Learning Outcome	Theory (15 hrs)	Practical (20 hrs)	Duration (35 hrs)
1. Describe the components of multirotor drone	<ol style="list-style-type: none"> Essential multirotor drone components: frame, motors, propellers, flight controller, ESC (electronic speed controllers), battery, etc. Sensors for drones (primary and secondary) Purpose and functionality of each component of multirotor drone Selection criteria for drone components based on application and requirements (payload capacity, flight time, range and communication, GPS and navigation, camera and imaging requirements, regulatory compliance, etc.) 	<ol style="list-style-type: none"> Visit to Drone Technology Lab for a demonstration of the function and use of arms, motors, propellers, electronic speed controller (ESC), Flight controller, etc. Preparing posters on the functionality of each component Group discussion on selection criteria for drone components Identify different kinds of primary and secondary sensors, mounted on multirotor drone. 	15
2. Demonstrate the multirotor drone assembly	<ol style="list-style-type: none"> Step-by-step guide to multirotor drone assembly – Frame assembly, installation of Electronic Speed Controllers (ESCs), attaching propellers, installation of flight controller, connecting power system, installation of radio transmitter and receiver, performing safety checks, testing the drone, fine tuning and configuration, and performing final safety checks. 	<ol style="list-style-type: none"> Demonstrate the dismantling and assembling of multirotor drone in the Drone Technology Lab. Discussion on proper handling and installation of components. 	10

3. Describe applications of multirotor drone	1. Applications of drones in the following areas/fields: <ul style="list-style-type: none"> • Agriculture and allied sector • Power line inspection • Wildlife monitoring • Oil and gas exploration • Land surveying • Disaster management • Safety and security • Futuristic applications (power line inspection, pipeline inspection, anti-poaching, alleviating traffic congestion, signs of wear, damage, or structural issues in buildings and concrete structures, accuracy in weather forecasting, etc.) 	1. Visit to nearest agricultural field to explore applications of multirotor drone 2. Hands-on training in land surveying and field mapping 3. Write a short note on futuristic application of multirotor drone	10
Total			35

UNIT 3: PAYLOADS AND IMAGE INTERPRETATION			
Learning Outcome	Theory (15 hrs)	Practical (15 hrs)	Duration (30 hrs)
1. Demonstrate mounting of payload on multirotor drone	1. Types of payloads (Dispensable payloads, Non-Dispensable payload, active payload and passive payloads) 2. Features of payloads (drone payloads include, weapon systems, cameras, sensors, delivery goods, additional sensors, devices and other items) 3. Mounting the payload on multirotor drone (balancing, securing the payload, wiring and connections, calibration, safety checks, ground test, flight test, etc.)	1. Visit to drone laboratory and observe the following: types of payload, parts of payload, load utilization 2. Case study on payloads	20

2. Interpret visual images and videos captured by drones	<ol style="list-style-type: none"> 1. Interpretation of images (machine learning algorithms and pattern recognition) 2. Video interpretation (anomaly detection, video analysis for crowd detection and monitoring) 	1. Demonstration of image/video interpretation and data analysis.	10
Total			30

UNIT 4: AERODYNAMICS AND CONFIGURATION OF MULTIROTOR DRONES

Learning Outcome	Theory (15 hrs)	Practical (15 hrs)	Duration (30 hrs)
1. Describe the aerodynamic and flight principles in drone operation	<ol style="list-style-type: none"> 1. Aerodynamic forces (lift, thrust, drag, weight) 2. Control surfaces and stability (pitch, roll and yaw, control surfaces and stability) 3. Flight modes (e.g., manual, stabilized, GPS-assisted, autonomous) 	<ol style="list-style-type: none"> 1. Group discussion on principles of aerodynamics (thrust, drag, lift, gravity, Bernoulli's principle and Newton's laws of motion). 2. Presentation on basic flight control. 3. Demonstrate different flight modes of multirotor drone. 	15
2. Configure the multirotor drone	<ol style="list-style-type: none"> 1. Configuration of multirotor drone – thrust vectoring and differential thrust. 	<ol style="list-style-type: none"> 1. Demonstrate thrust vectoring to control both the yaw (rotation around the vertical axis) and the pitch (tilting forward or backward) movements in the field. 	10
3. Describe the procedures adopted for maintenance of multirotor drone	<ol style="list-style-type: none"> 1. Routine maintenance tasks (cleaning, lubrication, propeller replacement, motor maintenance, pre-flight checks, and post-flight checks). 2. Storage of drones 3. Advanced maintenance (calibration, replacement of parts, etc.). 	<ol style="list-style-type: none"> 1. Demonstrate the basic procedures for multirotor drone maintenance. 	05
Total			30

UNIT 5: FLYING MULTIROTOR DRONE ON SIMULATOR

Learning Outcome	Theory (15 hrs)	Practical (15 hrs)	Duration (30 hrs)
1. Introduction to flight simulator training	<ol style="list-style-type: none"> 1. Flight simulator training: virtual environment, flight dynamics and realistic controls, training and skill development, scenario-based training, risk-free training, and performance analysis and feedback 2. Drone flight simulator- types of simulator (software-based simulators, hardware-integrated simulators, full-scale simulators, Virtual Reality Simulators (VRS), and Augmented Reality Simulators (ARS)). 3. Emergency scenarios: emergency procedures, cross-country navigation, instrument approaches, weather conditions, aircraft system simulations, crosswind landings, and flight scenario simulations. 	<ol style="list-style-type: none"> 1. Allow students to practice flying drones using flight simulators. 2. Demonstrate skills of hand-eye coordination in simulator-based training. 3. Demonstrate skills of flying, disorientation, recovery training, autonomous flight planning. 4. Use drone flight simulators to teach students about different flight scenarios while adhering to regulations. 	15
2. Demonstrate the operation of drone on flight simulator	<ol style="list-style-type: none"> 1. Flight simulator: launching the simulator, selecting drone model and environment, takeoff preparation, performing pre-flight checks, takeoff, basic flight maneuvers, different flying modes, landing the drone, post-flight analysis. 2. Reasons to use a drone flight simulator: skill development, risk-free 	<ol style="list-style-type: none"> 1. Visit to a drone laboratory for demonstration of safe drone flying on simulator. 2. Observe and share flight experience with wind effects, ground effects, simulated crashes. 3. Perform practical flying with instructor on a drone 	15

	training, cost savings, scenario-based training, weather and environment simulation, and equipment familiarization.	simulator.	
Total			30

CLASS 12

Part A: Employability Skills

S.No.	Units	Duration (hrs)
1.	Communication Skills - IV	25
2.	Self-management Skills - IV	25
3.	Information and Communication Technology Skills - IV	20
4.	Entrepreneurial Skills - IV	25
5.	Green Skills - IV	15
	Total	110

UNIT 1: COMMUNICATION SKILLS - IV

Learning Outcome	Theory (10 hrs)	Practical (15 hrs)	Duration (25 hrs)
1. Demonstrate active listening skills	1. Active listening -listening skill, stages of active listening 2. Overcoming barriers to active listening	1. Group discussion on factors affecting active listening 2. Preparing posters of steps for active listening 3. Role-play on negative effects of not listening actively	10
2. Identify the parts of speech	1. Parts of speech – using capitals, punctuation, basic parts of speech, Supporting parts of speech	1. Group practice on identifying parts of speech 2. Group practice on constructing sentences	10
3. Write sentences	1. Writing skills to the following: <ul style="list-style-type: none"> • Simple sentence • Complex sentence • Types of objects 2. Types of sentences : <ul style="list-style-type: none"> - Active and passive sentences - Statement/ 	1. Group work on writing sentences and paragraphs 2. Group work on practicing writing sentences in active or passive voice 3. Group work on writing different types of	05

	Declarative sentence - Question/ Interrogative sentence - Emotion/ Reaction or Exclamatory sentence - Order or Imperative sentence 3. Paragraph writing	sentences (i.e., declarative, exclamatory, interrogative and imperative)	
Total			25

UNIT 2: SELF-MANAGEMENT SKILLS – IV			
Learning Outcome	Theory (10 hrs)	Practical (15 hrs)	Duration (25 hrs)
1. Describe the various factors influencing motivation and positive attitude	1. Motivation and positive attitude 2. Intrinsic and extrinsic motivation 3. Positive attitude – ways to maintain positive attitude 4. Stress and stress management - ways to manage stress	1. Role-play on avoiding stressful situations 2. Activity on listing negative situations and ways to turn it positive	10
2. Describe how to become result-oriented	1. How to become result-oriented. 2. Goal setting – examples of result-oriented goals	1. Group activity on listing aims in life	05
3. Describe the importance of self-awareness and the basic personality traits, types and disorders	1. Steps towards self-awareness 2. Personality and basic personality traits 3. Common personality disorders- <ul style="list-style-type: none"> • Suspicious • Emotional and impulsive • Anxious 4. Steps to overcome personality disorders	1. Group discussion on self-awareness	10
Total			25

UNIT 3: INFORMATION AND COMMUNICATION TECHNOLOGY SKILLS - IV

Learning Outcome	Theory (06 hrs)	Practical (14 hrs)	Duration (20 hrs)
1. Identify the components of a spreadsheet application	1. Getting started with a spreadsheet - types of a spreadsheet, steps to start LibreOffice Calc., components of a worksheet.	1. Group activity on identifying components of spreadsheet in LibreOffice Calc.	02
2. Perform basic operations in a spreadsheet	1. Opening workbook and entering data – types of data, steps to enter data, editing and deleting data in a cell 2. Selecting multiple cells 3. Saving the spreadsheet in various formats 4. Closing the spreadsheet 5. Opening the spreadsheet. 6. Printing the spreadsheet.	1. Group activity on working with data on LibreOffice Calc.	03
3. Demonstrate the knowledge of working with data and formatting text	1. Using a spreadsheet for addition – adding value directly, adding by using cell address, using a mouse to select values in a formula, using sum function, copying and moving formula 2. Need to format cell and content 3. Changing text style and font size 4. Align text in a cell 5. Highlight text	1. Group activity on formatting a spreadsheet in LibreOffice Calc 2. Group activity on performing basic calculations in LibreOffice Calc.	02

4. Demonstrate the knowledge of using advanced features in spreadsheet	1. Sorting data 2. Filtering data 3. Protecting spreadsheet with password	1. Group activity on sorting data in LibreOffice Calc	03
5. Make use of the software used for making slide presentations	1. Presentation software available 2. Stapes to start LibreOffice Impress 3. Adding text to a presentation	1. Group practice on working with LibreOffice Impress tools	02
6. Demonstrate the knowledge to open, close and save slide presentations	1. Open, Close, Save and Print a slide presentation	1. Group activity on saving, closing and opening a presentation in LibreOffice Impress	01
7. Demonstrate the operations related to slides and texts in the presentation	1. Working with slides and text in a presentation-adding slides to a presentation, deleting slides, adding and formatting text, highlighting text, aligning text, changing text colour	1. Group practice on working with font styles in LibreOffice Impress	04
8. Demonstrate the use of advanced features in a presentation	1. Advanced features used in a presentation 2. Inserting shapes in the presentation 3. Inserting clipart and images in a presentation 4. Changing slide layout	1. Group activity on changing slide layout on Libre office Impress	03
Total			20

UNIT 4: ENTREPRENEURIAL SKILLS-IV

Learning Outcome	Theory (10 hrs)	Practical (15 hrs)	Duration (25 hrs)
1. Describe the concept of entrepreneurship	1. Entrepreneurship and entrepreneur 2. Characteristics of	1. Group discussion on the topic "An entrepreneur is not	10

and the types and roles and functions entrepreneur	<ul style="list-style-type: none"> entrepreneurship 3. Entrepreneurship-art and science 4. Qualities of a successful entrepreneur 5. Types of entrepreneurs 6. Roles and functions of an entrepreneur 7. What motivates an entrepreneur 8. Identifying opportunities and risk-taking 9. Startups 	<ul style="list-style-type: none"> born but created". 2. Conducting a classroom quiz on various aspects of entrepreneurship. 	
2. Identify the barriers to entrepreneurship	<ul style="list-style-type: none"> 1. Barriers to entrepreneurship 2. Environmental barriers 3. No or faulty business plan 4. Personal barriers 	<ul style="list-style-type: none"> 1. Group discussion about "What we fear about entrepreneurship" 2. Activity on taking an interview of an entrepreneur. 	05
3. Identify the attitude that make an entrepreneur successful	<ul style="list-style-type: none"> 1. Entrepreneurial attitude 	<ul style="list-style-type: none"> 1. Group activity on identifying entrepreneurial attitude. 	05
4. Demonstrate the knowledge of entrepreneurial attitude and competencies	<ul style="list-style-type: none"> 1. Entrepreneurial competencies 2. Decisiveness 3. Initiative 4. Interpersonal skills- positive attitude, stress management 5. Perseverance 6. Organizational skills- time management, goal setting, efficiency, managing quality. 	<ul style="list-style-type: none"> 1. Playing games, such as "Who am I". 2. Group discussion on business ideas 3. Group practice on "Best out of Waste" 4. Group discussion on the topic of "Let's grow together" 5. Group activity on listing stress and methods to deal with it like Yoga, deep breathing exercises, etc. 6. Group activity on time management 	05
Total			25

UNIT 5: GREEN SKILLS - IV			
Learning Outcome	Theory (05 hrs)	Practical (10 hrs)	Duration (15 hrs)
1. Identify the benefits of the green jobs	1. Green jobs 2. Benefits of green jobs 3. Green jobs in different sectors, such as the following: <ul style="list-style-type: none"> • Agriculture • Transportation • Water conservation • Solar and wind energy • Eco-tourism • Building and construction • Solid waste management • Appropriate technology 	1. Group discussion on the importance of green job.	08
2. State the importance of green jobs	1. Importance of green jobs in the following: <ul style="list-style-type: none"> • limiting greenhouse gas emissions • minimizing waste and pollution • protecting and restoring ecosystems • adapting to the effects of climate change 	1. Preparing posters on green jobs. 2. Group activity on tree plantation.	07
Total			15

Part B–Vocational Skills

S.No.	Units	Duration (hrs)
1.	Safety Regulations and Procedures in Drone Operation	30
2.	Emergency Procedures in Drone Operation	30
3.	Planning for Flying Multirotor Drone in Airspace	40
4.	Operating a Multirotor Drone	65
Total		165

UNIT 1: SAFETY REGULATIONS AND PROCEDURES IN DRONE OPERATION

Learning Outcome	Theory (15 hrs)	Practical (15 hrs)	Duration (30 hrs)
1. Describe safety regulations and guidelines	<ol style="list-style-type: none"> 1. Introduction to digital sky platform - guidelines issued by the Directorate General of Civil Aviation (DGCA) for commercial use of drones or remotely operated aircraft 2. Partitioning of Airspace for flying drones - Red Zone (flying not permitted), Yellow Zone (controlled airspace), and Green Zone (automatic permission). Respecting no-fly zones, which typically include airports, government buildings, and crowded public areas. 3. Rules and safety regulations for multirotor drone - Online registration of pilots, devices, service providers, and NPNT (no permission, no take-off) and do's and don'ts for safety 	<ol style="list-style-type: none"> 1. Group discussion guidelines issued by Directorate General of Civil Aviation (DGCA) for commercial use of drones or remotely operated aircraft. 2. Visit to nearby meteorological observatory to observe weather parameters (Temperature, wind speed and humidity) related to drone flight. 3. Group discussion on safety regulations for multirotor drone operation. 4. Simulate scenarios where the drone encounters issues and practice safe emergency landing procedures. 	20
2. Describe the regulations and protocols for ensuring the security of multirotor drone	<ol style="list-style-type: none"> 1. Regulations and protocols for ensuring security during drone operation 2. Legal requirements for drone registration, pilot license, and certification 3. Safety equipment 4. Implementing remote identification technologies to identify drones in real-time, allowing authorities and the public to verify 	<ol style="list-style-type: none"> 1. Conduct a comprehensive security assessment of the entire drone system, identifying potential weaknesses and developing mitigation strategies. 2. Use geofencing tools to set up no-fly zones and demonstrate how the drone adheres to these restrictions. 3. Implement a remote kill 	10

	drone identity. 5. Data privacy.	switch to showcase the ability to disable the drone in case of unauthorized use. 4. Educate the public about responsible drone use, safety guidelines, and privacy concerns.	
Total			30

UNIT 2: EMERGENCY PROCEDURES IN DRONE FLYING			
Learning Outcome	Theory (10 hrs)	Practical (20 hrs)	Duration (30 hrs)
1. Identify emergency procedures in drone flying	1. Flight hazards around structures 2. Common drone emergencies 3. Recommended emergency responses. 4. Do and don'ts during flight emergency	1. Group discussion on flight hazards 2. Poster on multirotor drone flight emergency procedures	10
2. Follow emergency procedures in drone flying	1. Drone emergency and handling procedure 2. Emergency procedures during loss of link 3. Emergency procedures during loss of power 4. Emergency procedures during fly away, loss of GPS, collision, etc.	1. Practice emergency procedures during loss of link. 2. Practice emergency procedures to be followed in case of loss of power. 3. Practice emergency procedures for dealing with fly away, loss of GPS, collision, etc. 4. Test the Return-to-Home (RTH) function in various scenarios to understand how the drone responds when it loses signal or encounters issues.	20
Total			30

UNIT 3: PLANNING FOR FLYING MULTIROTOR DRONE IN AIRSPACE			
Learning Outcome	Theory (10 hrs)	Practical (20 hrs)	Duration (30 hrs)
1. Describe the basic principles of drone flying	1. Fundamentals of flight and aerodynamics (take-off, Flight and landing, maneuvers, turns and circuit patterns)	1. Group Discussion on fundamentals of aerodynamics. 2. Planning to fly of multirotor drone, based on the aerodynamics and flight principles. 3. Practical session to learn basic maneuvers of multirotor drones.	10
2. Demonstrate the knowledge of preparing a mission plan for flying multirotor drone	1. Inspection of mission (location survey, risk assessment, equipment check, legal and regulatory compliance) 3. Mission checks (Pre-flight checklist, battery management, controller and communication) 4. Mission plan (flight path, altitude, speed, camera settings, emergency procedures) 5. Mission operations (takeoff and landing, real-time monitoring, data collection, post-flight analysis, data storage)	1. Divide students in groups. Provide students with sample mission checklists. Provide students with drones and related equipment. Each group will conduct a simulated pre-mission inspection, checking for hardware, software, and safety features and prepare a write-up. 2. Create a scenario where drones are deployed for an inspection mission (e.g., inspecting a building for structural integrity). Ask students to identify potential risks and safety hazards associated with the mission site. Ask students to prepare inspection reports detailing the identified risks,	

		proposed safety measures, and equipment readiness.	
3. Identify pre-flight checks and operations	<ol style="list-style-type: none"> 1. Conducting pre-flight inspections 2. Pre-flight checks 3. Pre-flight operations 4. Determining airspace requirements 5. Evaluating forecast weather 6. Performing a site evaluation 7. Checking state and local regulation. 	<ol style="list-style-type: none"> 1. Visit to the field and practice pre-flight checks and operations 2. On-site assessment for operation using a checklist and adjusting the flight profile 3. Discuss the effect of weather parameters on drone operations 	10
4. Interpret post-flight operations, checks and inspections	<ol style="list-style-type: none"> 1. Pre-landing operations 2. Post-landing inspections 3. Post-flight checks 4. Areas of focus 5. Manual flight profiles 	<ol style="list-style-type: none"> 1. Practice session on checks to be performed for pre- and post-landing of drone 	10
Total			30

UNIT 4: OPERATING A MULTIROTOR DRONE

Learning Outcome	Theory (30 hrs)	Practical (35 hrs)	Duration (65 hrs)
1. Demonstrate the procedure to develop expertise in multirotor drone flying	<ol style="list-style-type: none"> 1. Basic flight maneuvers (takeoff and landing, hovering, banked turns, yaw control) 2. Basic flight patterns (flying in figure of 8 at different elevations, square pattern, circle pattern, etc.) 3. Advanced maneuvers (flips and rolls, auto-stabilisation mode) 4. Autonomous flying 5. Night flying 	<ol style="list-style-type: none"> 1. Hands on practice on different flight maneuvers and patterns. 2. Poster presentation on different flight patterns using multirotor drones. 3. Practice flying multiple drones simultaneously, focusing on coordination and avoiding collisions. 4. Maintain flight logs, including details such as location, altitude, 	35

		and flight duration, as required by many regulatory authorities.	
2. Demonstrate basic operating capability for flying multirotor drone	<ol style="list-style-type: none"> 1. Select a multirotor drone 2. Carry out demo flight 3. Take-off of drone and carry-out flight stage. 4. Perform in-flight checks. 5. Approach and safe landing procedures 	<ol style="list-style-type: none"> 1. Practice drone flying through games 2. Fly a multirotor drone under the supervision of instructor. 3. Fly a multirotor drone without the help of an instructor. 	30
Total			65

6. ORGANISATION OF FIELD VISITS

In an academic year, at least three field visits should be organised for the students to expose them to agricultural practices and to learn about drone operations. The following aspects are to be covered during the field visits:

1. Introduction to Drone Technology:

- a) **Drone Components:** Students will understand the basic components of a drone, including the frame, motors, propellers, and sensors.
- b) **Flight Operations:** Students will learn how to plan drone flights, including takeoff, landing, and emergency procedures.
- c) **Safety Protocols:** Students will how to follow safety measures such as no-fly zones, altitude limits, and avoiding obstacles.

2. Data Collection and Sensors:

- a) **Remote Sensing:** Students will understand how sensors on drones capture data in various wavelengths (visible, infrared, thermal) for agricultural analysis.
- b) **Data Interpretation:** Students will learn how to interpret data.

3. Mapping and Surveying:

- a) **GIS Mapping:** Students will explore Geographic Information Systems (GIS) and how mapping with drones contributes to the objective of data analysis.
- b) **Surveying Techniques:** Students will understand how drones can create 3D models and topographic maps.

4. Regulations and Compliance:

- a) **Regulations and Compliance:** Students will about DGCA regulations and guidelines for drone operations in agriculture.

- b) **Permits and Licenses:** Students will understand the process of obtaining permits and licenses for multirotor drone operations.

5. Practical Training:

- a) **Flight Simulations:** Students will use drone flight simulators to practice flight operations and maneuvering without the risk of damaging actual drones.
- b) **Hands-on Flying:** Students will learn to fly drones under supervision, allowing them to apply theoretical knowledge in real-world settings.

6. Data Analysis and Reporting:

- a) **Data Processing Tools:** Students will be introduced to software tools for processing and analyzing drone-collected data, such as GIS software and agricultural analytics platforms.
- b) **Report Generation:** Students will learn how to generate comprehensive reports based on the collected data, including actionable insights for farmers.

7. LIST OF EQUIPMENT AND MATERIAL

The drone laboratory aims in nurturing young talents by bringing in multirotor and fixed wing drone development and real-world flight-testing experiences at the school level courses as well as working on societal-application based projects. The tools, equipment and materials required for training are quite expensive, therefore, only basic tools, equipment and accessories should be procured by the Institution so that the routine tasks can be performed by the students regularly for practice and acquiring adequate practical experience.

A simulator may be procured for training and regular field visits should be organised to provide opportunities to the students/trainees for observation and hands-on practice.

S.No.	List of equipment, tools and material	Quantity	Estimated Cost (Rs)
I.	Drones		
1.	Commercial drone, Wifi Headless Mod FPV RC Quadcopter 0.3MP Camera 2.4GHz 6-axis 360 Degree Eversion RTF – Black	1	25000
II.	Custom-made drones		
2.	Hexacopter with 1080 HD camera, transmitter and receiver with autopilot, 7 inch ground display and control unit & GPS	1	25000
3.	Plastic Hexacopter with Propulsion Kit (Motor + ESC + Propeller + Flight Controller + Frame + TX-RX Fly sky FSi6 + Power module + Belt)	1	28000
4.	Quadcopter drone Combo with Pix hawk Kit for beginner (Motor + ESC + Propeller + Flight Controller + Frame + TX-RX Fly sky FSi6 + Power module + Belt)	4	80000
5.	Micro Quadcopter kit	1	25000
6.	Fixed Wing UAV with 2.4 GHz, Digital Six Channel Transmitter with HD Camera	1	25000

8. VOCATIONAL TEACHER'S/TRAINER'S QUALIFICATION AND GUIDELINES

Qualification and other requirements for appointment of vocational teachers/trainers on contractual basis should be decided by the State/UT. The suggestive qualifications and minimum competencies for the vocational teacher should be as follows:

Qualification	Minimum Competencies	Age Limit
Undergraduate Degree in any Science Discipline, with specialisation in Electronics/Aeronautical Engineering/Agricultural Engineering/Mechanical Engineering/Mechatronics/Drone Technology from a recognized Institute /University Or B.Voc. (Bachelor of Vocations) degree, with specialisation in Electronics/ Aeronautical Engineering/ Agricultural Engineering /Mechanical Engineering/Mechatronics/Drone Technology from a recognized Institute /University.	Effective communication skills (oral and written) Basic computing skills.	18-37 years - as on Jan. 01 (mention year). Age relaxation to be provided as per Govt. rules.

Vocational Teachers/Trainers form the backbone of Vocational Education being imparted as an integral part of *Samagra Shiksha*. They are directly involved in teaching of vocational subjects and also serve as a link between the industry and the schools for arranging industry visits, On-the-Job Training (OJT) and placement. These guidelines have been prepared with an aim to help and guide the States in engaging quality Vocational Teachers/Trainers in the schools. Various parameters that need to be looked into while engaging the Vocational Teachers/Trainers are mode and procedure of selection of Vocational Teachers/Trainers, Educational Qualifications, Industry Experience, and Certification/Accreditation. The State may engage Vocational Teachers/Trainers in schools approved under the component of Vocationalisation of Secondary and Higher Secondary Education under *Samagra Shiksha* in the following ways:

(i) directly as per the prescribed qualifications and industry experience suggested by the PSS Central Institute of Vocational Education (PSSCIVE), NCERT or the respective Sector Skill Council (SSC) OR (ii) through accredited Vocational Training Providers accredited under the National Quality Assurance Framework (NQAF*) approved by the National Skill Qualification Committee on 21.07.2016. If the State is engaging Vocational Teachers/Trainers through the Vocational Training Provider (VTP), it should ensure that VTP should have been accredited at NQAF Level 2 or higher.

** The National Quality Assurance Framework (NQAF) provides the benchmarks or quality criteria which the different organizations involved in education and training must meet in order to be accredited by competent bodies to provide government-funded education and training/skills activities. This is applicable to all organizations offering NSQF-compliant qualifications.*

The educational qualifications required for being a Vocational Teacher/Trainer for a particular job role are clearly mentioned in the curriculum for the particular NSQF compliant job role. The State should ensure that teachers / trainers deployed in the schools have relevant technical competencies for the NSQF qualification being delivered. The Vocational Teachers/Trainers preferably should be certified by the concerned Sector Skill Council for the particular Qualification Pack/Job role which he will be teaching. Copies of relevant certificates and/or record of experience of the teacher/trainer in the industry should be kept as record. To ensure the quality of the Vocational Teachers/Trainers, the State should ensure that a standardized procedure for selection of Vocational Teachers/Trainers is followed. The selection procedure should consist of the following:

1. Written test for the technical/domain specific knowledge related to the sector;
2. Interview for assessing the knowledge, interests and aptitude of trainer through a panel of experts from the field and state representatives; and
3. Practical test/mock test in classroom/workshop/laboratory. In case of appointment through VTPs, the selection may be done based on the above procedure by a committee having representatives of both the State Government and the VTP. The State should ensure that the Vocational Teachers/Trainers who are recruited should undergo induction training of 20 days for understanding the scheme, NSQF framework and Vocational Pedagogy before being deployed in the schools. The State should ensure that the existing trainers undergo in-service training of 5 days every year to make them aware of the relevant and new techniques/approaches in their sector and understand the latest trends and policy reforms in vocational education. The Head Master/Principal of the school where the scheme is being implemented should facilitate and ensure that the Vocational Teachers/Trainers:
 - a) Prepare session plans and deliver sessions which have a clear and relevant purpose and which engage the students;
 - b) Deliver education and training activities to students, based on the curriculum to achieve the learning outcomes;
 - c) Make effective use of learning aids and ICT tools during the classroom sessions;
 - d) Engage students in learning activities, which include a mix of different methodologies, such as project-based work, team work, practical and simulation-based learning experiences;
 - e) Work with the institution's management to organize skill demonstrations, site visits, on-job trainings, and presentations for students in cooperation with industry, enterprises and other workplaces;
 - f) Identify the weaknesses of students and assist them in upgradation of competency;
 - g) Cater to different learning styles and level of ability of students;
 - h) Assess the learning needs and abilities, when working with students with different abilities;
 - i) Identify any additional support the student may need and help to make special arrangements for that support; and

- j) Provide placement assistance.

Assessment and evaluation of Vocational Teachers/Trainers is very critical for making them aware of their performance and for suggesting corrective actions. The States/UTs should ensure that the performance of the Vocational Teachers/Trainers is appraised annually. Performance based appraisal in relation to certain pre-established criteria and objectives should be done periodically to ensure the quality of the Vocational Teachers/Trainers. Following parameters may be considered during the appraisal process:

1. Participation in guidance and counselling activities conducted at Institutional, District and State level;
2. Adoption of innovative teaching and training methods;
3. Improvement in result of vocational students of Class X or Class XII;
4. Continuous up gradation of knowledge and skills related to the vocational pedagogy, communication skills and vocational subject;
5. Membership of professional society at District, State, Regional, National and International level;
6. Development of teaching-learning materials in the subject area;
7. Efforts made in developing linkages with the Industry/Establishments;
8. Efforts made towards involving the local community in Vocational Education
9. Publication of papers in National and International Journals;
10. Organization of activities for promotion of vocational subjects;
11. Involvement in placement of students/student support services.

9. LIST OF CONTRIBUTORS

1. **Dr. Vinay Swarup Mehrotra**
Professor & Head
Department of Curriculum Development and Evaluation Centre (CDEC) and Centre for International Relationship (CIR), PSS Central Institute of Vocational Education (PSSCIVE), NCERT, Shyamla Hills, Bhopal – 462 002, Madhya Pradesh, India.
2. **Dr. Prerana Nashine**
Assistant Professor
(Contractual)
Department of Curriculum Development and Evaluation Centre (CDEC)
PSS Central Institute of Vocational Education (PSSCIVE), NCERT,
Shyamla Hills, Bhopal – 462 002, Madhya Pradesh, India.
3. **Dr. Satya Prakash Kumar**
Scientist
ICAR-Central Institute of Agricultural Engineering
Nabi Bagh, Berasia Road, Bhopal, Madhya Pradesh, India.

4. Dr. Bikram Jyoti

Scientist

ICAR-Central Institute of Agricultural Engineering

Nabi Bagh, Berasia Road, Bhopal, Madhya Pradesh, India.

5. Dr. Yogesh Rajwade

Scientist
